- SIP Benefits

Shared Investigator Platform (SIP)

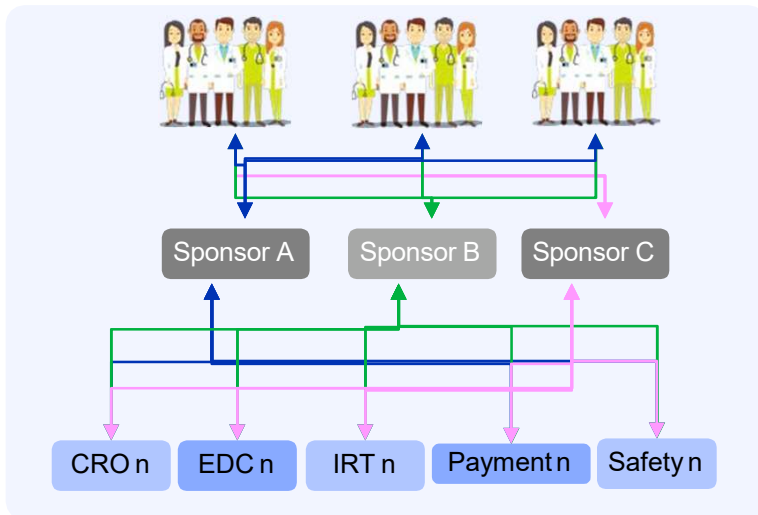

SIP is a collaborative cloud-based technology platform that reduces the operational challenges of clinical trials by bringing sites and sponsors together in one secure, common solution.

Improved operational
efficiencies

Accelerated timelines

SIP Journey: WHY

Investigators: Sponsor-centric clinical research eco-system is inefficient

75% sites report too many user IDs & passwords¹

15% of start-up time spent on redundant non-specific trainings/doc¹

Lack of central location for study documents¹ (distribution mainly done by emails)

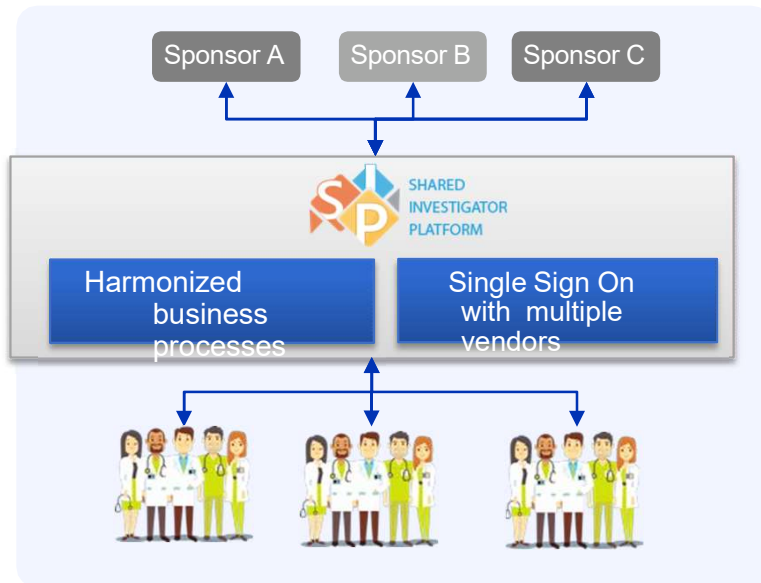

Are you constantly losing vital staff hours?
Repeatedly entering and updating site and staff information for each of the sponsors, you work with.

is it a struggle trying to prioritize and manage your workload across sponsors and studies while having to log in an out of different applications?

These pain points needed the industry to come together to find an “industrial solution” in the form of the Shared Investigator Platform (SIP).

SIP- NOW

Vision of SIP is to be an open industry collaboration platform for all stakeholders of clinical research

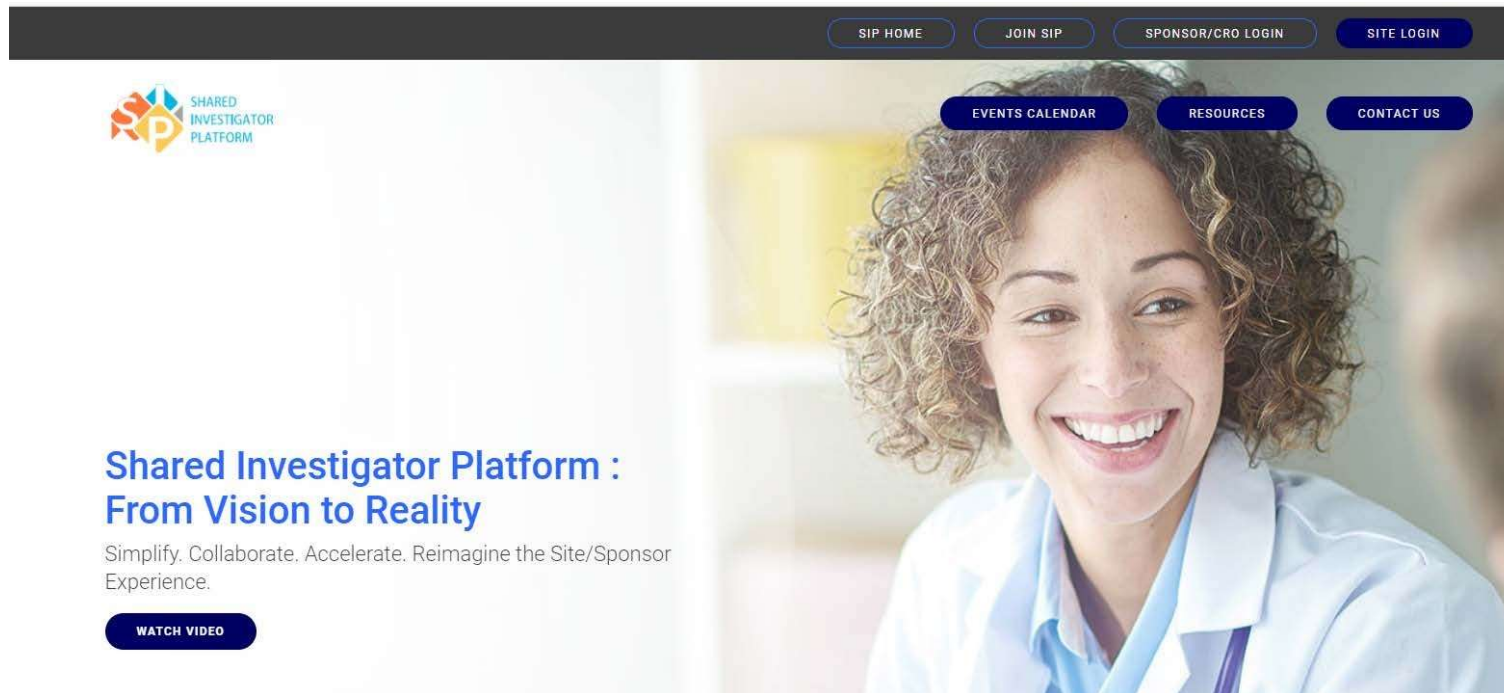

**One User Name,
Password across
multiple Sponsors and
their tools**

**Mutually Recognized
training across multiple
Sponsors**

**Central location
for study documents &
harmonized business
processes across
Sponsors**

SIP- Demo

SIP: <https://www.sharedinvestigator.com/hosipme>

The screenshot shows the homepage of the Shared Investigator Platform. At the top, there is a dark navigation bar with four buttons: "SIP HOME", "JOIN SIP", "SPONSOR/CRO LOGIN", and "SITE LOGIN". Below this, on the left, is the "SHARED INVESTIGATOR PLATFORM" logo. On the right, there are three buttons: "EVENTS CALENDAR", "RESOURCES", and "CONTACT US". The main content area features a large image of a smiling woman in a white lab coat. To the left of the image, the text reads "Shared Investigator Platform : From Vision to Reality" followed by the tagline "Simplify. Collaborate. Accelerate. Reimagine the Site/Sponsor Experience." and a "WATCH VIDEO" button.

SIP Capabilities

SIP is now the industry's preferred Site Collaboration Platform

SITE ADOPTION

2020 YTD

- ~ 110,000 Clinical Research users across
- 84 countries;
- ~20,400 Clinical Research Locations

SPONSOR ADOPTION

LIVE across 7 of the **Top 15 Biopharmaceutical** companies

SIP Document Exchange Live Across 6 Sponsors

4 Sponsors moving large portions of portfolio to SIP in 2020

Most Sponsors putting all new trials on SIP in 2020

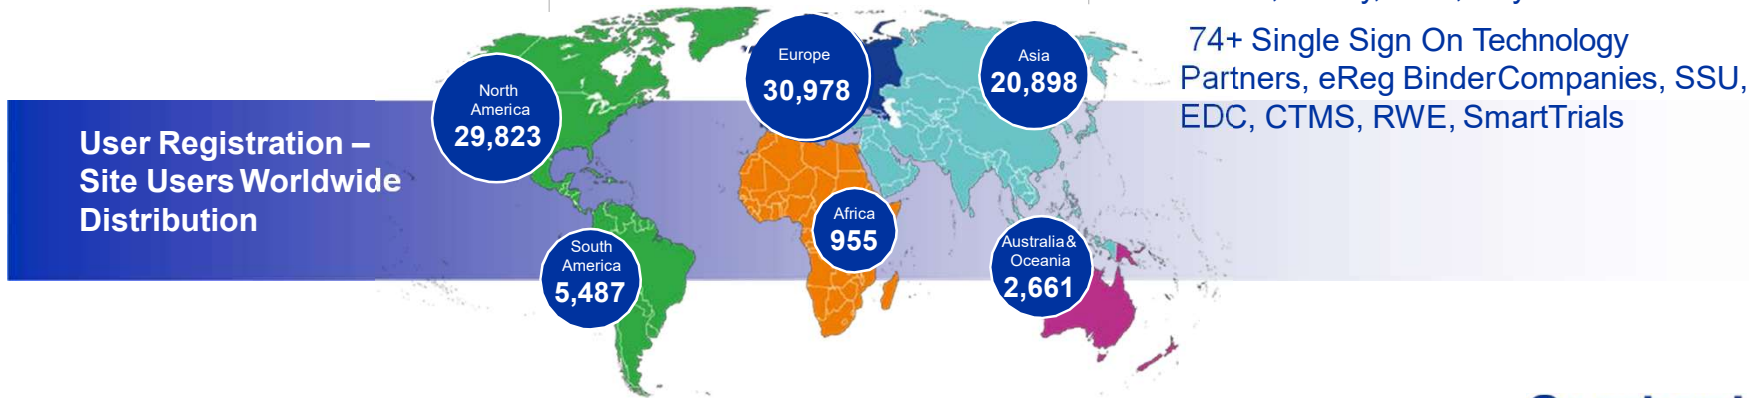

INDUSTRY ADOPTION

Growing Alliances with Sites facing Organizations SMO, Networks, Academic Associations including AACI and SCRS

Unified SIP Ecosystem:

SIP Integrated with sponsor clinical operations systems including: eTMF, CTMS, Safety, SSU, Payments

74+ Single Sign On Technology Partners, eReg Binder Companies, SSU, EDC, CTMS, RWE, SmartTrials

SIP Benefits

Manage multiple studies from multiple sponsors with a single sign-on and user interface

Reduce/Manage Site and Sponsor Workload

REDUCE REDUNDANT TRAINING

SHORTER & PROTOCOL DRIVEN FEASIBILITY SURVEYS

REDUCE THE NUMBER OF SAFETY NOTIFICATIONS

STREAMLINE DELEGATION TO SITE STAFF & CENTRAL OFFICES

Eliminate Data Entry by Reusing Data Across Studies

SEARCHABLE DIGITAL CV'S PROVIDE ACCESS TO NEW STUDY OPPORTUNITIES

POST COMMON DOCUMENTS ONCE AND ELIMINATE THE NEED TO SUBMIT THEM FOR EACH STUDY

REUSABLE STUDY SITE PROFILE ELIMINATES REENTRY OF SITE DATA

REUSABLE FACILITY/DEPARTMENT PROFILES ELIMINATE REENTRY OF FACILITY DATA & SHORTEN FEASIBILITY SURVEYS

Improve Data Quality

ENSURE THAT SPONSORS HAVE ACCESS TO THE LATEST INFORMATION ABOUT YOUR EXPERIENCE

ENSURE THAT SPONSORS ACCESS THE LATEST INFORMATION ABOUT YOUR SITE/RESEARCH CAPABILITIES

ACCESS ALL STUDY DOCUMENTS IN A SINGLE LOCATION

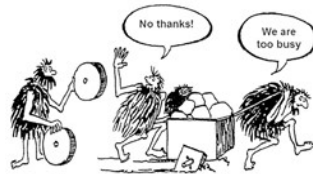

SHARED ELECTRONIC STUDY FILES INCREASE THE QUALITY OF YOUR INVESTIGATOR STUDY FILE & REDUCE THE RISK OF AUDIT FINDINGS

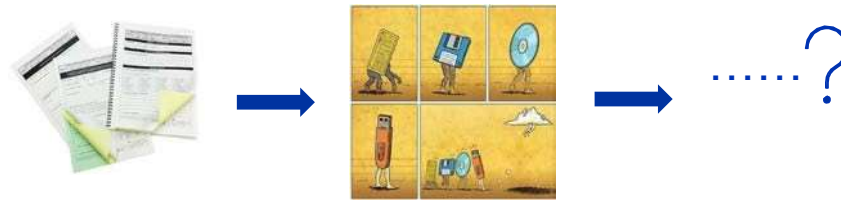

Cognizant

What is SIP

Innovation?.....

Technology, technology?.....

Game changer ?.....

New Way of doing things...?

It's actually about patients and about getting treatments to patients faster
